

We are working to reduce pointless single-use plastic

Single-use plastic is a problem. Very little is recycled, and too much reaches the sea where it harms marine wildlife. Of the rubbish collected on Cyprus beaches, 80% is plastic waste.

This hotel is taking part in **Keep Our Sand and Sea Plastic Free**, a project bringing tourist businesses, visitors and residents together to reduce plastic.

At this time, hygiene remains our primary concern. However, we are finding safe ways to ensure that the pandemic does not make plastic pollution worse.

What are we doing?

We are getting rid of items such as plastic straws, choosing recycled or non-plastic alternatives, and recycling as much as possible. Talk to our staff to find out more.

What can you do?

- **Reduce** the amount of packaging you throw away in resort - eg if you bring cosmetics with you, bring the bottles home
- **Reuse** items such as water bottles and cups if you can do so safely
- **Responsibly** dispose of any plastic you do use, recycling where possible
