

Dear Guest,

This hotel is taking part in the **KEEP OUR SAND AND SEA PLASTIC FREE** project.

Most of the waste in Cyprus currently goes to landfill and plastic never degrades. Tourism contributes towards much of this waste.

At this time, hygiene remains our primary concern. We are finding safe ways to ensure that the pandemic does not make plastic pollution worse.

Can you help us cut down on single-use plastic? Here are some things you can do during your stay.

Reuse the same water bottle throughout your holiday (ask us for water refills at the bar). Please only take one plastic cup and reuse it around the pool.

Reuse the same plastic bag when shopping, or take a reusable cloth one.

Reduce the amount of packaging you throw away in resort - eg if you bring cosmetics with you, bring the bottles home. If you are using the toiletries supplied by the hotel, please make sure you use the whole container before disposing of it.

Bin liners are only provided in your bathroom bin in your room so if you have anything messy please dispose of this in the bin in your bathroom.

Refuse plastic straws in drinks.

Responsibly dispose of masks and gloves - keep them out of the sea!

Small changes make a big difference. Thank you.
